Professional Summary

Results-oriented Horticulture student with a strong foundation in crop management and plant pathology. Passionate about pioneering sustainable farming practices by integrating cutting-edge AgriTech, including AI-powered disease detection and data-driven agronomy.

Education

Bachelor of Science (B.Sc.) in Horticulture | 2023 - 2026
Govt. Holkar Science College, Indore

Core Competencies

- Horticultural Science: Advanced knowledge in Farm Management, Plant Pathology, and Post-Harvest Technology.
- AgriTech & Innovation: Practical experience in AI-powered disease detection and precision agriculture techniques.
- Data Analysis & Visualization: Proficient in Excel, Power BI, and Python for analyzing agricultural data.

Professional Skills

- Strong problem-solving abilities
- Effective communication for collaborative projects

Projects

- AI-Powered Plant Disease Detection: Engineered a proof-of-concept web application that leverages machine learning to accurately identify crop diseases from leaf imagery, providing a rapid diagnostic tool.
- Crop Data Analysis Dashboard (Power BI): Designed and built an interactive Power BI dashboard to analyze and visualize complex datasets on crop yield, translating raw data into actionable insights.

Certifications & Achievements

- PW Skills - Data Analyst Course
- Workshop on Generative AI
